

Serving Industry Since 1947

# Sweep Underground Tank Heater Kit

*If it's safe, reliable and efficient ... it must be PHCo*

**Ready HMAs? Process Heating is going "underground"  
Process Heating's Problem Solving:  
The HMAs are first in line as Process Heating Company introduces  
a major advancement in underground tank heater technology.**

***It starts at the top.*** The SWEEP system inserts at the TOP of the below-ground tank. The Lo-Density electric elements sweep down from the top for maximum control and efficiency. ***Maintenance and replacement are from the top.*** No need to send personnel into the tank. The system is trouble free, efficient and environmentally friendly.

environmentally friendly. ***Heavy duty savings*** result from easy topside access, cost-effective Lo-Density technology, and automatic controls that take advantage of low off-peak power rates. U.L. Listed control panels and elements listed by ETL for maximum protection.

**Process Heating Company, Inc.**

*Providing industry with efficient, reliable electric heating systems since 1947.*
