electric
control*

- ◆ Lighting control panels
- ◆ Temperature control
- ◆ Motor control panels
- ◆ Pumping control panels
- ◆ Waste water control
- ◆ Hazardous materials
- ◆ Silicon rectifier types
- ◆ Access control panels
- ◆ Alarm panels
- ◆ HVAC panels
- ◆ Load distribution
- ◆ Marine industry
- ◆ Disconnect switch types
- ◆ Microprocessor types

The second generation of PHCo ownership holds firm to the family tradition of delivering - on time - products of unequalled quality, precision and reliability

PHCo - Pioneers in resistance technology

Process Heating Company has designed and manufactured resistance-type industrial heating systems for more than 50 years. Expertise in control panel technology is a natural outgrowth of both the experience and the specialized skills we have built up over the years.

High-Tech Control Panels, including SCRs and those that call for computer logic circuitry, are a part of PHCo's expertise. We also maintain a large inventory of mechanical temperature controllers (Partlow, Robertshaw and United Electric) with a wide variety of capillary lengths and ranges.

Please feel free to ask questions or to request specifics on your control panel needs.
