

Process Heating Company, Inc.

With Over Fifty Years of Designing & Manufacturing Lo-Density Automatic Electric Heating Systems

Custom UL Listed Glass Furnace Control Panels

Process Heating Company has the capabilities to custom design and build a SCR control panel to operate your glass furnace. 208, 240 or 480 Volt in single or three phase. We can also supply your low voltage transformers.

Perfect for the glass artist who wants to build their own electric furnace. We can build a panel for Silicon Carbide (SiC or Star Bar) or Molybdenum Disilicide (MoSi₂ or Moly D) heating elements.

Features

- UL Listed Industrial Control Panel
- Main Disconnect with through door operator
- Service Entrance rating available – saves money on installation in many applications
- Digital indicating dual display temp control
- Digital indicating high limit temp control
- High limit warning light
- Fused control power transformer
- Phase Angle Fired SCR Power Control
- Backup magnetic contactor
- Three pole load fuse block(s) with fuses
- All components mounted, prewired and functionally tested.

Panel with transformer
